

We claim:

1. A shopping cart child carrier attachment device removably attachable to a shopping cart having a basket supported above a wheeled, lower frame member having a laterally extending frame crossbar member defining its forward portion, said shopping cart child carrier attachment device comprising:

a main body sized to receive and support at least one child;

frame attachment means for removable attachment of said main body to said frame member of said cart; and

10 basket attachment means for removable attachment of said main body to said basket of said cart;

whereby said main body is suspended from the front of said cart.

2. The device of claim 1, wherein said frame attachment means comprises at least one frame receiving channel disposed on said main body, said frame receiving channel adapted to receive said frame crossbar member of said cart.

3. The device of claim 2, wherein said frame attachment means further comprises at least one mounting flange.

20

4. The device of claim 1, wherein said basket attachment means comprises a mechanical fastener.

5. The device of claim 2, wherein said basket attachment means comprises a mechanical fastener.

5 6. The device of claim 3, wherein said basket attachment means comprises a mechanical fastener.

7. The device of claim 1, wherein said basket attachment means comprises a hook member.

10 8. The device of claim 2, wherein said basket attachment means comprises a hook member.

9. The device of claim 3, wherein said basket attachment means comprises a hook member.

10. The device of claim 1, wherein said basket attachment means comprises a basket flange  
15 member.

11. The device of claim 2, wherein said basket attachment means comprises a basket flange member.

20 12. The device of claim 3, wherein said basket attachment means comprises a basket flange member.

13. The device of claim 1, wherein said main body further comprises a support platform.

14. The device of claim 1, wherein said main body further comprises a seat.

5 15. The device of claim 1, wherein said main body member further comprises at least one entrance.

16. The device of claim 1, wherein said main body further comprises at least one wheel.

10 17. The device of claim 1, wherein said main body is configured to resemble a vehicle.

18. The combination of a child carrier attachment and a shopping cart, said shopping cart comprising a basket supported above a wheeled, lower frame member having a laterally extending frame crossbar member defining its forward portion, said child carrier attachment  
15 being removably mounted to said cart and comprising:

a main body sized to receive and support at least one child;

frame attachment means for attaching said main body to said frame member of said cart;

and

basket attachment means attaching said main body to said basket of said cart;

20 whereby said main body is suspended from the front of said cart.

19. The combination of claim 18, wherein said frame attachment means comprises at least one frame receiving channel disposed on said main body, said frame receiving channel adapted to receive said frame crossbar member of said cart.

5 20. The combination of claim 19, wherein said frame attachment means further comprises at least one mounting flange.

21. The device of claim 18, wherein said basket attachment means comprises a mechanical fastener.

10

22. The device of claim 19, wherein said basket attachment means comprises a mechanical fastener.

23. The device of claim 20, wherein said basket attachment means comprises a mechanical  
15 fastener.

24. The device of claim 18, wherein said basket attachment means comprises a hook member.

20 25. The device of claim 19, wherein said basket attachment means comprises a hook member.

26. The device of claim 20, wherein said basket attachment means comprises a hook member.

27. The device of claim 18, wherein said basket attachment means comprises a basket flange member.

28. The device of claim 19, wherein said basket attachment means comprises a basket flange member.

29. The device of claim 20, wherein said basket attachment means comprises a basket flange member.

30. The device of claim 18, wherein said main body further comprises a support platform.

31. The device of claim 18, wherein said main body further comprises a seat.

32. The device of claim 18, wherein said main body member further comprises at least one entrance.

33. The device of claim 18, wherein said main body further comprises at least one wheel.

34. The device of claim 18, wherein said main body is configured to resemble a vehicle.

26. The device of claim 20, wherein said basket attachment means comprises a hook member.

27. The device of claim 18, wherein said basket attachment means comprises a basket flange member.

28. The device of claim 19, wherein said basket attachment means comprises a basket flange member.

29. The device of claim 20, wherein said basket attachment means comprises a basket flange member.

30. The device of claim 18, wherein said main body further comprises a support platform.

31. The device of claim 18, wherein said main body further comprises a seat.

32. The device of claim 18, wherein said main body member further comprises at least one entrance.

33. The device of claim 18, wherein said main body further comprises at least one wheel.

34. The device of claim 18, wherein said main body is configured to resemble a vehicle.
